WORK EXPERIENCE

Société Générale   **Bengaluru, India**
Software Engineer   *Mar 2020 - Present*

- Spearheaded the integration of user-driven features built with ReactJS and NestJS. This resulted in a remarkable 30% improvement in user engagement metrics, fostering deeper platform interaction and higher user retention rates.
- Orchestrated a seamless integration of CRR3 & ESG compliance features into the banking app using NodeJS, Express, and Oracle SQL/PostgreSQL/MongoDB with Prisma ORM, resulting in a 90% decrease in customer complaints related to regulatory issues.
- Implemented an autonomous script using NodeJS or Python (depending on the script) to reduce manual monitoring tasks by 50%, freeing up valuable time for staff to focus on strategic projects and innovation initiatives.
- Utilized in-house ChatGPT technology to streamline communication between employees and HR, resulting in a 40% increase in efficiency in resolving policy inquiries.
- Mentored junior team members in software development best practices using ReactJS and Javascript resulting in a 20% increase in their coding efficiency and productivity.
- Orchestrated the identification of key talent acquisition channels and the creation of a focused recruitment strategy. As a result, a 20% surge in qualified candidate hires was achieved within half a year.

SKILLS

Frontend: NextJS, ReactJS, Javascript, TailwindCSS, shadcn/ui, HTML5, CSS3.

Backend: NodeJS, NestJS, Express

Database: Oracle SQL, PostGresSQL, MongoDB, Prisma ORM.

PERSONAL PROJECT

Trello Clone

- Designed and implemented innovative features for this Kanban-style web application, boosting user engagement metrics by 20%. Notably, a user-friendly column reordering feature significantly improved user satisfaction.
- Spearheaded the integration of Next.js, Supabase, Tailwind CSS, and shadcn/ui to optimize development workflow, culminating in a 30% decrease in project completion time, highlighting expertise in cutting-edge tech utilization for enhanced efficiency.
- Directed and integrated custom features to enhance project efficiency, yielding a remarkable 15% reduction in project completion times; adeptly applied project management expertise to achieve measurable improvements in operational productivity.

Firebase Chat App

- Built a real-time chat application (React.js, Tailwind CSS, Firebase) prioritizing user experience, leading to a 20% growth in engagement and retention metrics.
- Reduced page load times by 30% with a comprehensive responsive design framework, driving a 15% boost in mobile traffic (mobile-first focus).
- Deployed the app on Netlify for enhanced accessibility and scalability, further increasing engagement metrics by 30% (deployment best practices).

EDUCATION

Babu Banarasi Das National Institute of Technology   **Lucknow, Uttar Pradesh**
Bachelor of Technology Electrical Engineering.
